Fine Stuff (Non Hydraulic Lime Plaster) – Data Sheet

Product

Womersley's ready-mixed fine plaster is a ready to use rich non-hydraulic lime plaster that simply requires 'knocking-up' prior to application.

Mix Ratio – 1:1 Mature Lime Putty and Fine Silver sand

It is made using our top-quality lime putty which will be a guaranteed minimum 4 months mature.

Usage

Suitable as an internal fine top coat plaster going over either a Natural Hydraulic or Non Hydraulic base coat / float coat.

Coverage

A 10l / 16kg tub is sufficient to plaster 3m² at 3mm.

Advantages

- Quality controlled production
- Consistency of mix ratio
- Significantly improved workability and reduced risk of shrinkage
- Extended working and finishing time.

Colours

This product is entirely natural.

Surface Preparation

Preventing the plaster from drying out too quickly is key to the success of the application. Lightly spray the base coat and pour away any excess water in the fine stuff tub before application with a float.

How to Apply

Once the fine stuff is firm but not dry use a dampened brush to brush the surface in all directions. Avoid overworking, applying too thick or using too greater pressure on it will lead to crazing. During cold weather supplementary heating will be needed to keep the room temperatures above the minimum of eight degrees.

Curing and Why

Non-Hydraulic Lime mortars do not set as quickly as modern cement based products or Natural Hydraulic Lime. They set by carbonation, meaning a much slower set and the lime remains softer and

more breathable. This process will be influenced by climatic conditions and will behave very differently between the seasons

This characteristic gives the product a long shelf life providing that the material is kept sealed and air-tight preventing carbonation. The plaster may stiffen over time in storage but can be 'knocked up' again and again to the ideal consistency.

Packaging

Available in a 10l / 16kg tub. The plastic used is suitable for recycling.

Storage

This product can be stored in dry conditions and should be kept away from freezing conditions. The shelf life is technically indefinite but realistically we would recommend use within 12 months.

Health and Safety

Risk Phrases	Safety phrases
R36/37/38 Irritating to eyes, respiratory system and skin	S2 Keep out of reach of children
R43 Contact with wet mortar may cause irritation, dermatitis and/or burns	S26 In case contact with eyes, rinse immediately with plenty water and seek medical advice.
R 66 Repeated exposure may cause skin dryness and cracking	S24/25 Avoid contact with skin and eyes
	S36 Wear suitable protective clothing

Declaration

This product contains no NHL, pozzolans or cement.

All Womersley's products are manufactured under an ISO9001:2015 accredited factory production control system.
