

Ironstone Basecoat Render

A professional grade premixed natural hydraulic lime render with a coarse texture and contemporary white finish for basecoats or float coats or as a textured finish topcoat. Manufactured in partnership with Heidelberg Materials Socli.

25kg

Bulk bag

Ironstone Basecoat Render is a factory blended mortar that takes all variables out of the equation, made using 100% pure Heidelberg Materials Socli high performance Natural Hydraulic Lime, well graded kiln dried sand and alkaline resistant fibres. Ironstone Basecoat Render offers all the advantages of the Ironstone ready mixed range but with conservation-appropriate work aids added to significantly improve the mortars physical and mechanical performance.

Suitable for both internal and external backgrounds. The addition of fibres provides reinforcement, improved tensile strength and assists to mitigate cracking especially when using on high-suction backgrounds.

Benefits:

- Breathable, durable, sustainable and natural
- Features the feel of a modern render / plaster
- Enhanced workability
- Extended working and finishing time
- Promotes even curing for an improved bond
- Salt resistant

Ironstone Basecoat Render is ideal for older buildings where a pure lime render is required.

A 25kg bag yields approximately 15litres of render and covers 1.5m² at 10mm. Do not use in temperatures below 5C or above 30C. Whilst curing protect from adverse environmental conditions including frost, rain, direct sunlight and drying winds.

Surface Preparation:

Remove dust, surface contaminants and loose or crumbly material. Ensure Masonry is not waterproofed or painted.

Application:

Mix with clean water approximately 4 to 4.5 litres of water to each 25 kg of Basecoat Render.

Please read the datasheet for further advice on mixing, quenching and application. Do not add anything other than clean water.

Further Coats:

Ironstone Basecoat Render, Ironstone Finishing Render after 2 to 7 days once the coat has stiffened / hardened, but is still "green".
